Tomas Trnecka

Resident Solutions Specialist at Veritas Technologies LLC
Slovakia

Summary

Experienced Storage and Automation Engineer with a demonstrated history of working in the information technology and services industry. Skilled in Storage Area Network (SAN, Brocade), HPE 3PAR/Primera Storage, Storage Automation, Storage Performance Troubleshooting and Web development - Ruby On Rails and Flask.

Lately shifting my interests and skills towards Cloud (Azure, AWS, and VMware), Devops and CDCI technologies (Chef, Jenkins, Ansible). Programming in Golang, Python and Ruby on daily basis.

Currently working on building CDCI solution to build, test and scan docker images used for our offering.

One of my biggest accomplishments is storage management and reporting solution BEARS deployed in production for over 10 years and used to manage 1500 SAN switches and over 60PB of storage arrays.

Experience

Veritas Technologies LLC
Resident Solutions Specialist
September 2023 - Present (3 years)
Slovakia

Serving as the resident specialist for an enterprise reporting solution focused on backup and storage environments (IT Analytics). Responsibilities include leading and supporting IT Analytics deployments across multiple customer accounts, as well as tuning and optimizing the supporting Oracle database, Apache web server, and Tomcat application services. This role involves hands-on troubleshooting, performance analysis, and occasional code review to ensure a stable and efficient reporting platform.

Additional duties include designing and developing SQL-driven report templates tailored to customer requirements, working closely with operational teams, and providing ongoing subject matter expertise to ensure the environment runs smoothly and delivers meaningful insights.

DXC Technology

7 years 6 months
